AeroMarine Silicone Accelerator

AeroMarine Silicone Accelerator is added to any AeroMarine condensation cure silicone rubber to quickly cure material. It is not to be used with any silicones that are not 10:1 tin (condensation) cured. This special catalyst additive must be added to the regular catalyst before mixing with Part A. The following times are based on the amount of accelerator added to the regular catalyst. These figures are the ratio of accelerator to the regular catalyst, not the total mix.

- .2% by weight to catalyst gives a 20 minute pot life and 3 hour demold time
- .6% by weight to catalyst gives a 5 minute pot life and 2 hour demold time
- 1.0% by weight to catalyst gives a 3 minute pot life and 1 hour demold time

AeroMarine Products (seller) makes no warranties, express or implied, including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose. User is responsible for determining whether the seller's product is fit for a particular purpose and suitable for a user's particular method of application. Many factors can affect the use and performance of seller's product. Given the variety of factors that can affect the use and performance of seller's product, some of which are uniquely within the user's knowledge and control, it is essential that the user evaluate the seller's product to determine whether it is fit for a particular purpose and is suitable for the user's method of application. If the seller's product is proven to be defective, THE EXCLUSIVE REMEDY, AT SELLER'S OPTION, SHALL BE TO REFUND THE PURCHASE PRICE OF OR TO REPAIR OR REPLACE THE DEFECTIVE PRODUCT. Seller shall not otherwise be liable for loss or damages, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including, but not limited to, contract, negligence, warranty, or strict liability.
