Graphite Powder

Graphite powder can be used as a coloring agent which can produce low friction exterior surfaces ideal for boat hulls. Graphite powder can be used in precision applications, such as locks, bearings, fishing reels and pinewood derby cars. An excellent conductor of electricity, this powder is used in the manufacture of conductive materials and coatings. We recommend pre-measuring the resin and hardener and mixing the graphite powder in with the resin prior to adding the hardener to save your work life. Once the graphite powder is thoroughly mixed into the resin add the hardener.

ALWAYS WEAR PROPER SAFETY EQUIPMENT WHEN WORKING WITH PARTICULATES.

AeroMarine Products (seller) make no warranties, express or implied, including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose. User is responsible for determining whether the seller's product is fit for a particular purpose and suitable for a user's particular method of application. Many factors can affect the use and performance of seller's product. Given the variety of factors that can affect the use and performance of seller's product, some of which are uniquely within the user's knowledge and control, it is essential that the user evaluate the seller's product to determine whether it is fit for a particular purpose and is suitable for the user's method of application.

If the seller's product is proven to be defective, THE EXCLUSIVE REMEDY, AT SELLER'S OPTION, SHALL BE TO REFUND THE PURCHASE PRICE OF OR TO REPAIR OR REPLACE THE DEFECTIVE PRODUCT. Seller shall not otherwise be liable for loss or damages, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including, but not limited to, contract, negligence, warranty, or strict liability.
